## **NEWPOINT TECHNOLOGIES ANNOUNCES RICHARD FULLERTON JOINS SALES AND MARKETING TEAM**

Salem, NH, August 18, 2008 – Newpoint Technologies, Inc., a wholly-owned subsidiary of Integral Systems, Inc. (NASDAQ: ISYS), and a recognized leader in Network Management and Remote Site Monitoring solutions, is pleased to welcome Richard Fullerton to our sales and marketing team as our Director of Business Development - Europe. Richard brings with him over a decade of experience in network engineering. He has successfully integrated, managed and sold projects in Europe, Asia, Africa, Australia, and Latin America. "Richard's exceptional international customer relationships will add an important facet to the Newpoint team as we continue to expand in the global marketplace and refocus our efforts in Europe" said Newpoint President Wally Martland. "He is a seasoned, well respected industry professional with a great deal of network management experience to share."

Richard's most recent experience was with Datapath Inc., formerly Industrial Logic Controls (ILC) as the International Accounts Executive responsible for global install base sales and driving new business in Latin America. He also has extensive industry experience as a project manager, systems/consulting engineer, and training manager. His primary focus will be on identifying new business opportunities and creating partner relationships in Europe. Richard will be attending the IBC2008 show in Amsterdam from September 12-17 in Newpoints booth 1:A01 and will be showing the new Compass Inventory and Service Management Modules.

For more information regarding Newpoint's Network Management Systems, please visit [www.newpointtech.com](http://www.newpointtech.com).

**About Newpoint Technologies**

Newpoint Technologies, Inc., a subsidiary of Integral Systems, Inc., is an industry leader in Satellite and Terrestrial Network Management Systems for control of data, Internet, broadcast, telecom, and hybrid networks. Newpoint has also been the industry's dominant supplier of software and hardware for remote site management products. Newpoint's principal customers are commercial satellite operators, telecommunications companies, broadcasters, and broadband service providers. Newpoint delivers a range of services, from out-of-the-box software to complete turnkey solutions that manage large enterprise-level infrastructure systems.

### **About Integral Systems**

Founded in 1982, Integral Systems is a leading provider of satellite ground systems and has supported more than 205 different satellite missions for communications, science, meteorological, and earth resource applications. Integral Systems was the first company to offer an integrated suite of COTS (Commercial-Off-the-Shelf) software products for satellite command and control: the EPOCH IPS (Integrated Product Suite) product line. EPOCH IPS has become the world market leader in commercial applications with successful installations on five continents.

Through its wholly-owned subsidiary, SAT Corporation, Integral Systems provides satellite and terrestrial communications signal monitoring systems to satellite operators and users throughout the world. Through its Newpoint Technologies, Inc., subsidiary, Integral Systems also provides software for equipment monitoring and control to satellite operators, broadcasters, and telecommunications firms. Integral Systems' RT Logic subsidiary builds telemetry processing systems for military applications, including tracking stations, control centers, and range operations. Integral Systems' Lumistar, Inc., subsidiary provides system- and board-level telemetry acquisition products. Integral Systems has approximately 500 employees working at its headquarters in Lanham, MD, and at other locations in the U.S. and Europe. For more information, visit <http://www.integ.com>.
